

# UK Asset Operating Status Report

Last updated: **01/05/2012 10:33**

For live terminal flow information visit the National Grid Instantaneous Flow Report website here: <http://www.nationalgrid.com/uk/Gas/Data/EFD/>

Asset Area	Typical Production Rate	Category	Description	Shutdown/ Restriction Date	Expected Return To Availability	Next Planned Outage Period*		
						Period	Type	Comments
<b>TGT</b>	10.25 - 11.25 MCM/day	-				17/05/2012 06:00 to 24/05/2012 06:00 inc.	Full	
<b>Other</b>								

A Shutdown/Restriction will be reported when it is likely to significantly affect market price

Shutdown and start up dates are provided to the same accuracy as supplied to National Grid under the requirements of the Grid Code.

All Expected Return to Availability dates are subject to late change due to operational reasons.

Typical Production Rate refers to the maximum and minimum daily production seen at the asset within the last 30 days excluding planned/unplanned shutdowns

\*Where a future date is shown, the date shown will be indicative only.
